The Kenya wildlife Foundation

The Kenya suffer from the mass-tourism and the presence of poachers.

Since 1985 the Kenya wildlife Foundation has taken action for the well-being of the kenyan wildlife and its threatened species. In the beginning we were only around ten that our passion for the preservation of this environment has gathered.

Nowadays we have employees throughout the whole Kenya who keep under surveillance every person who could be poachers. Among us there are Maasai who are locals and so who know the situation in the savannah. It's an advantage for us in order to stand against these hunters that only take ivory of wild animals interests and it is also empowering for the Maasai community to take part in the protection of wildlife.

An ancestral tradition of this tribe is to kill lions to prove their strength. Now they belong to our cause.

Our organisation supports the local population because we think that they shouldn't be bypassed, it shows us that all can change for the best.

As well we take care of the Kenyan shore and its endangered wildlife. We denounce mass-tourism which is an environmental disaster and we fight for a sustainable tourism.

Protecting our landscape and nature is such an important cause and we hope that a lot of people will join us. By little gestures like a donation or just reducing your waste, trying organic cooking and composting you can help our fighting.

One aim

Preserving the environment is our priority.
We want to show you that the wildlife around us is so amazing and that we have to take care of it.

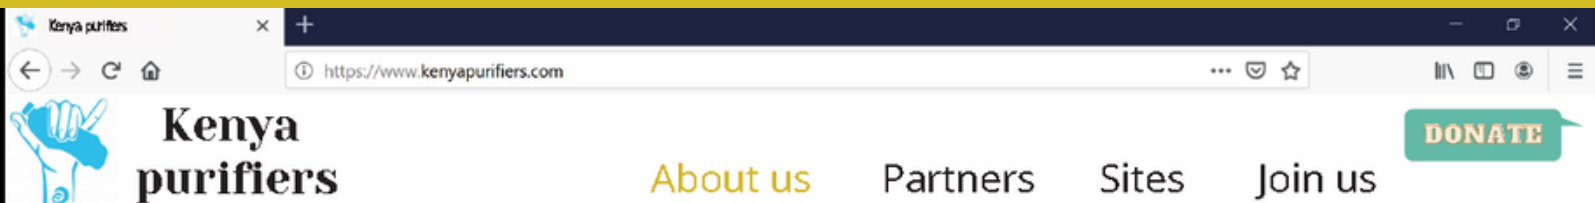

Many actions

- Help the Maasai community
- Raise awareness at schools

Cleaning up beaches, inches by inches

Shores clean up

For the past few years, the amount of washed up litter spoiling Kenyan landscapes has been critically increasing. In 2017, a Kenyan family decided to take action, in order to solve this main issue, by creating our association. Twice a month we organise trash pickups, seeking for new sites to be cleaned up on each operation. We sort out waste afterwards to recycle it properly. During the previous year, we have collected altogether 8 000 pounds of trash. This helpful gesture has allowed to rehabilitate beaches as threatened as Takaungu was to give Kenya back its heavenly coastline back.

Plastic bottles challenge

In November 2019, our company had challenged Kenyan inhabitants: we asked them to collect plastic bottles in order to recycle them. At least 2 000 000 bottles have been collected! The goal was to make people aware of this pollutant, and to make sure they don't throw away their wastes in the streets, especially plastic bottles. People get 1 US \$, when they bring back 20 bottles. That way it encourages people to clean the beach because they want to earn more money. This initiative is such an important project that it has already reduced the amount of plastics on the beach. Furthermore this program helped us to aggregate a huge quantity of plastics and it allowed us to make cheap recycled wheelchairs. The project "plastics bottles challenge" has been a successful share for 17 months now! Indeed we were able to provide free wheelchairs for poor disabled people who couldn't afford one by themselves. Therefore, we were able to improve the quality of their lives. What an altruistic and preserving project! If you want to join us in this awesome plan click on "join us" and you will receive the newsletter of Kusaga Chupa Company!

newsletter

We aspire to minimize the impact of tourism on the environment.

By choosing to travel with us, you will participate in the development of the local populations since we work in collaboration with local communities (for example our guides and drivers all are part of the Maasai community) which promotes their empowerment

So this experience is as positive for the tourists as it is for inhabitants and you will definitely learn lots of things about Kenyan culture.

Kenya is a country that combines wildlife and modernity, with breathtaking landscapes that you will be able to discover through the trips we offer.

Unfortunately, animals in Kenya are impacted by tourism, this is why we make sure to not degrade anything.

Our work consists in offering you fully organized trips with measures for the environment while making it not affect your vacation and let you enjoy Kenya. Several options are available depending on how much you want to spend and what you want to do.

Places/ hotels you will be able to stay at are aware and share our opinions such as protecting marine life by making sure no plastic bag is thrown into the sea.

THE WILDLIFE DESERVES OUR ATTENTION

OUR STORY

The green Kenyans is a foundation to protect wild animals. Kenya is a breathtaking country where you can meet poachers. Before this foundation, many animals that brought tourists to savanna are endangered and poached, poaching is widespread in Kenya. So, we aim to protect these animals from poaching and employ Maasai. Animals' protecting is our goal. The monitoring of animals in Kenya is our priority. During our projects, we were able to collaborate with many animal protection professionals to improve our procedures. We employed Kenyans to help us in Savannah. And thanks to their great knowledge of flora and fauna, we have intervened for the animals about fifty times.

OUR PROJECT

Our projects which are important to us are two very impressive and unfortunately very violent projects. The first project we worked on is a family of lions. This family was being hunted by the Maasai and we protected the lions from them. When we found them two lion cubs were running away and their parents were very badly injured. By protecting some Maasai, we saw that we can live with wild animals. And that's how we got the idea for this association, and it was later invented. And the project that struck us the most was the time we rescued albino giraffes from the hands of poachers. The poachers were chasing them and if they had succeeded they would have butchered them and stole their furs.

Kenya's Landscapes are in danger.

Since 2005

Help us to preserve the landscapes and flowers of Kenya.

In Kenya, there are a lot of beautiful landscapes with a lot of flowers. But a lot of flowers are collected and then sold. Help us to protect the flowers and the landscapes.

Several types of environment destroyed :

The Landscapes :

The landscapes of Kenya are destroyed by the human. The tourism destroys landscapes by going on safari or by doing quad on the beach. The flower industry impacts also the landscapes by collecting flowers.

The Industries :

The flower industries flower harvest a lot of flowers and destroy the landscape. This is detrimental to the beautiful landscape of this country.

The Lakes :

In Kenya, there are a lot of lakes. But many of them are polluted by the pesticides of flowers. The fishermen want the flowers to stop being sprinkled of pesticides because the lakes become polluted and the fish die or get sick.

PLASTIC, A SECOND LIFE !

The official publication of Recycled flip-flops company

Our company is thought to be the only business of its kind and scale in the world.

We serve the clients, while protecting Kenya, because Kenya is particularly polluted and we don't want to discard this wonderful country :

" Without litter, the world is better" .

Picture taken in Kenya

THE RECYCLED COMPANY, SUCH A GREAT INITIATIVE :

It helps cleaning beaches and Kenyan beautiful landscapes, because obviously, the items are used Flip-Flops found in the nature, but that we recycled for the happiness of our client and because the earth needs preserving.

Now, I hope you understand the impact of this company to stand against the pollution.

It's not everything, this project could be such a rewarding option for you :

Our company sold many handmade items for anyone like colorful jewellery, sculptures

from the plastic composing flip-flops and other beautiful artworks,

(do not hesitate to visit our online shop to make purchases).

Moreover, our company has many craftspeople, which allows the creation of employments.

WE HAVE THE POWER TO CHANGE A COUNTRY

[Home](#) 

Hi and welcome on the website of SaveKenya ! We are an environmental organisation and our mission is to raise awareness about the Kenya's situation. Indeed, the country receives a lot of tourists who are essential for the economy but damage the environment. Turtles eat the plastic you left on the shore, wildlife is endangered by the poachers, lakes got dried by insecticides and so many others issues occur in Kenya.

So we are coming with solutions ! Firstly, we think it is important to make tourists aware thanks to campaigns. Moreover, we have to empower the local peoples, guide them towards more autonomy and encourage them to protect the wildlife. We are thinking about collecting the litter in order to give them a second life and sustain the economy. To finish, we will democratize natural alternatives to insecticides for the flower industry.

We hope our ideas have convinced you and that you are willing to join us or to raise funds for our organisation. Because without your help we will not be able to achieve our actions and Kenya would be neglected.

We trust in you !

WHO WE ARE AND WHAT WE DO

We are an organization founded in 2003 and we are concerned by ecological issues in the country, our goal is to protect the environment and the well-being of the inhabitants. We want to preserve the fauna, flora, reduce the pollution of the seas, fight against the climate change.

Kenya is a country which attracts a lot of tourists that seeked masotourism. Indeed, travels are often offered in package deals which include the plane ticket, the accommodation, the activities. However, it has a negative impact on the environment and the local community's lifestyle.

The goal of our organization is to improve the well-being of the people living there as well as the wildlife, the scenery (landscapes...).

Kenya is a country which suffers from pollution, deforestation, climate change, the destruction of ecosystems...

OUR FAVOURITE PROJECT

ALL THOSE PROBLEMS MUST BE SOLVED TO GIVE THE PEOPLE A BETTER WAY OF LIFE. THAT'S WHY WE NEED YOU.

MOST OF THE POPULATION DON'T HAVE THE ACCESS TO DRINKABLE WATER WHILE IT IS VITAL

THEREFORE OUR MAIN PROJECT IS TO DIG WELLS SO THAT ALL THE PEOPLES OF THE COUNTRY (MASAI, KAMBA...) CAN HAVE ACCESS TO DRINKABLE WATER.

IF YOU'RE INTERESTED IN HELPING US PLEASE CONTACT THE ORGANIZATION AS SOON AS POSSIBLE SINCE WE ARE ORGANIZING A TRIP TO SET UP THE PROJECT I

IF YOU WANT TO SUPPORT OUR ORGANIZATION, SUBSCRIBE TO OUR NEWSLETTER, BECOME A MEMBER AND DONATE IF YOU WANT TO HELP KENYA'S PEOPLES TO SURVIVE I

WILDLIFE
CONSERVATION
ORGANISATION

UHI FADHI PORI

**FOR A GOOD
PLANET, YOU HAVE
TO KNOW
HOW TO RECYCLE!**

WHO WE ARE

The mission of our organization, Uhifadhi pori, is to conserve wildlife, specifically the turtles. Our organization has been created in 2005 in order to save turtles. The most of us are volunteers and local inhabitant.

WHAT WE DO

Preserving the natural habitat of turtles in Kenya is crucial. The turtles are endangered by mass tourism and tourist resorts. Litter pollutes the sea and these are eaten by turtles, which die afterwards. Today, six of the seven living species are treated as threatened or critically endangered. The volunteers of the association collect plastic trash so as to recycle it afterwards into objects, in order to limit the amount of waste on the beaches and the coasts, which threatens wildlife and therefore the turtles. Furthermore, poachers can kill turtles for their shells, so we supervise 2 or 3 nights a week the coasts of the beaches most popular with poachers.

OUR PROJECTS

We organize clean walks on different beaches since 2006. During these clean walks, we picked up hundreds or thousands of kilograms of litter that we sent to a company. This company recycles trash to turn them into decoration, musical instruments, fashion clothes, and so many other things. In 2010, we signed a petition to banish the bright lights of the resorts, that face the beaches and can confuse nesting turtles. Now, we try to sensitize tourists and Kenyan population, because if everybody makes efforts that will limit the extinction of turtle species.

Kenya Wildlife Nursery

**Taking Care of Wild Baby Animals to Give Them
a Life of Freedom !!!**

Do you want to discover a wonderful country, Kenya in another way ? Do you love baby animals, especially wild baby animals ? You can join our association, the Kenya Wildlife Nursery. How about making babysitting for elephants, being a wild animal groomer, being a teacher for little monkeys ?

Much species in Kenya are endangered. Join our association if you want to be useful for the wildlife preservation.

If you are interested by our project click on each tab to have more informations.

RhinoProtect

What is caring for rhinos is beneficial for humans !

Education of children

With the money raised we built a center to educate Maasai children about the animal cause . Preserving the rhino is crucial

Eco-tourism

There are so many safari to ur guide that they damage rhino. To stop this we organised trips where tourists stand against pollution of savannah

Action of Maasai

Solidarity Trip

What an rhino species threaten are! More than 57 rhinos are killed in 2013. Our challenge is take action to protect wildlife. For instance, limiting mass tourism to advantage eco-tourism

Wild life that bring tourists to Kenya are endangered species. In order to protect the rhino and the wildlife, "RhinoProtect" foundation organize trips. We target sustainable tourists because they are central to Kenya, and with the money from the trips we pay nurses, provide food, train rangers, and provide education to young people. Finally , the other goals are to denounce the land clearing and raise awareness

PREPARING YOUR
TRIP

ACTION OF MAASAI

Kenya is in Africa nears to the sea in east coast. Contrast between the freedom of wildlife versus skyline is so impressive .Kenya was turned toward nature . Indeed they are more than fifty national park and reserve . They are lot of wild animals or species rare who are endangers

Maasai is ancestral tribe that lives in maori national park in Kenya .Once Maasai community kill animals enjoy lions as rite of passage prove strength. Now locals change of tradition to protect wildlife. Our organisation enables them to acquire skills to care for and feed the rhinos. Last year we enable two Maasai to become vets and gave birth to a baby rhino .However the main problem is bypassing the Maasai .Tourism is essential to Kenya and yet it can have a harmful impact on its nature with help of Maasai .The Maasai limited footprint of tourist in the natural habitat of rhino

We count on you !
